

At day's end, a job well done.

You know that feeling. You've satisfied your toughest customer... yourself. And it's with that same sense of pride that Diamond introduces its new Outlaw[®] rasp. Made from high carbon steel, then honed to maximum sharpness using a unique new process, this rasp is perfect for aggressive, yet controlled hoof removal. The Outlaw takes foot down fast, but with a smoothness you have to feel to believe. And the specially shaped teeth help resist clogging in all conditions, even on the wettest jobs. See the new Outlaw rasp soon wherever quality farrier tools are sold.
